## MEMORANDUM

April 26, 2018

**To:** Atlantic Herring Section, Atlantic Herring Advisory Panel, Interested Parties

**From:** Toni Kerns, ISFMP Director *TMK*

**RE:** Area 1A Trimester 2 Effort Controls and Meeting Notice

The Atlantic States Marine Fisheries Commission's (Commission) Atlantic Herring Section members from Maine, New Hampshire, and Massachusetts set the effort control measures for the 2018 Area 1A Trimester 2 (June 1 - September 30) fishery as follows:

### Days Out of the Fishery

- Vessels with a *herring Category A permit* that have declared into the Trimester 2 Area 1A fishery may land herring four (4) consecutive days a week. One landing per 24 hour period. Vessels are prohibited from landing or possessing herring caught from Area 1A during a day out of the fishery.
  - Landing days in New Hampshire and Massachusetts begin on Monday of each week at 12:01 a.m.
  - Landings days in Maine begin on Sunday of each week at 6:00 p.m.
- *Small mesh bottom trawl vessels with a herring Category C or D permit* that have declared into the Trimester 2 fishery may land herring seven (7) consecutive days a week.

### Weekly Landing Limit

- Vessels with a herring Category A permit may harvest up to 480,000 lbs (12 trucks) per harvester vessel, per week.
- 80,000 lbs (2 trucks) out of the 480,000 lbs weekly limit can be transferred to a carrier vessel (see below).

### At-Sea Transfer and Carrier Restrictions

*The following applies to harvester vessels with a herring Category A permit and carrier vessels landing herring caught in Area 1A to a Maine, New Hampshire, or Massachusetts port.*

- A harvester vessel can transfer herring at-sea to another catcher vessel.
- A harvester vessel is limited to making at-sea transfers to only one carrier vessel per week.
- Carrier vessels are limited to receiving at-sea transfers from one catcher vessel per week and can land once per 24 hour period. A carrier vessel may land up to 80,000 lbs (2 trucks) per week. The carrier limit of 2 trucks is not in addition to the harvester weekly landing limit.

- Carrier vessel: a vessel with no gear on board capable of catching or processing fish.
- Harvester vessel: a vessel that is required to report the catch it has aboard as the harvesting vessel on the Federal Vessel Trip Report.

The initial Area 1A sub-annual catch limit (ACL) is 31,962 metric tons (mt) after adjusting for a carryover from 2016 and the research set-aside. The Section allocated 72.8% of the sub-ACL to Trimester 2 and 27.2% to Trimester 3. After incorporating the 295 mt fixed gear set-aside and the 8% buffer (Area 1A closes at 92% of the sub-ACL), the seasonal quotas are 21,192 mt for Trimester 2 and 7,918 mt for Trimester 3.

These effort controls are projected to extend the Trimester 2 fishery through mid-September. Landings will be monitored closely and the fishery will be adjusted to zero landing days when the trimester's quota is projected to be reached.

The Atlantic Herring Section members from Maine, New Hampshire, and Massachusetts are scheduled to reconvene via conference call to review fishing effort the following days.

- Tuesday, June 26 at 10:00 am
- Tuesday, July 17 at 10:00 am
- Wednesday, August 8 (time TBD)

To join the calls, please dial 888.585.9008 and enter conference room number 845-202-505 when prompted.

The start date and time for the Area 1A Trimester 2 fishery is Sunday, June 3<sup>rd</sup> at 6:00 p.m. in Maine and Monday, June 4<sup>th</sup> at 12:01 a.m. in New Hampshire and Massachusetts. As a result, fishermen are prohibited from landing more than 2,000 pounds of Atlantic herring per trip from Area 1A until June 3 or 4, 2018, depending on the state. Please contact Megan Ware at [mware@asmfc.org](mailto:mware@asmfc.org) or 703.842.0740 for more information.
