Eastern Ecological Science Center Supervisory Fish & Wildlife Administrator (GS-13)

Partner and Employee Engagement Chief

We are seeking a dynamic leader to serve as the Eastern Ecological Science Center (EESC)’s Partner and Employee Engagement Team Program Manager! This is a new team established at the EESC which is critical to achieving the center’s vision through establishment of partner champions and a highly engaged workforce. Specific duties include:

- Center Leadership - leading the center’s Partner and Employee Engagement Team & working closely with the Center Director and Management Team.
- Partner Development and Coordination - increase engagement, reach and impact of the EESC’s science capabilities and products through responsive, and well-aligned science investments to partner priorities.
- Strategic Planning - establish intermediate and long-term strategies to achieve a high performing partner and employee engagement program for the EESC.
- Program Management - manage and supervise 5-7 biologists and information management professionals to effectively implement the EESC’s partner and employee engagement program.
- Communications and Information Management - represent USGS Mission Area, Region, and/or center by serving as a point of contact in a variety of scientific, partner and public forums, and provide leadership, guidance and support to EESC team members in developing effective communication products.

The EESC is multi-location USGS science center including research laboratories in Kearneysville, WV, Laurel, MD, and Turners Falls, MA as well as co-located scientists in other locations in the Eastern U.S. Collectively, the center’s mission is to conduct innovative science to meet our nation’s pressing conservation challenges and support the conservation and management of aquatic and terrestrial resources under DOI trust responsibility. The center’s science program includes a budget of $25 million and approximately 150 scientific and science support personnel. This workforce places value on commitment to excellence, scientific leadership, integrity, innovation, continued improvement, and high relationship trust.
