ASMFC American Lobster Board Initiates Addendum to Jonah Crab FMP

Draft Addendum to Consider Changes to Non-trap Bycatch Limit

St. Augustine, FL – The Commission’s American Lobster Management Board initiated Addendum I to the Jonah Crab Fishery Management Plan (FMP) to consider changes the incidental bycatch limit for non-trap gear. The FMP currently prescribes a 200 crabs per calendar day/500 crabs per trip incidental bycatch limit; however, concerns were expressed over the appropriateness of these limits. Data submitted by the New England Fishery Management Council and NOAA Fisheries illustrated while 97-99% of trips from 2010 through 2014 have been within the current limit, there were a number of trips above the limit. Furthermore, current bycatch landings are sufficiently low, accounting for approximately 1% of total landings.

Given a goal of the Jonah Crab FMP is to prevent expansion of the fishery while including all current participants, the Board has initiated an addendum to consider altering the incidental bycatch limit with options to increase the limit to 1000 crabs per trip or eliminate the bycatch limit for non-trap gear. Draft Addendum I will be presented to the Board in February. If approved, the Board would release the Draft Addendum for public comment and will consider final approval of the addendum at the Commission’s Spring Meeting in May. For more information, please contact Megan Ware, FMP Coordinator, at mware@asmfc.org or 703.842.0740.
