ASMFC Horseshoe Crab Board Sets 2022 Specifications for Horseshoe Crabs of Delaware Bay Origin

Arlington, VA – The Commission’s Horseshoe Crab Management Board approved the harvest specifications for horseshoe crabs of Delaware Bay origin under the Adaptive Resource Management (ARM) Framework. The Board established a harvest limit of 500,000 Delaware Bay male horseshoe crabs and zero female horseshoe crabs for the 2022 season based on the harvest package recommended by the Delaware Bay Ecosystem Technical Committee and ARM Subcommittee. Per the allocation mechanism established in Addendum VII, the following quotas were set for the States of New Jersey, Delaware, and Maryland and the Commonwealth of Virginia, which harvest horseshoe crabs of Delaware Bay origin:

	2022 Delaware Bay Origin Horseshoe Crab Quota (no. of crabs)	2022 Total Quota*
State	Male Only	Male Only
Delaware	162,136	162,136
New Jersey**	162,136	162,136
Maryland	141,112	255,980
Virginia***	34,615	81,331

* Total male quotas includes crabs which are not of Delaware Bay origin.

** New Jersey has maintained a harvest moratorium for horseshoe crabs since 2008.

*** Virginia harvest refers to harvest east of the COLREGS line only.

The ARM Framework, established through Addendum VII, incorporates both shorebird and horseshoe crab abundance levels to set optimized harvest levels for horseshoe crabs of Delaware Bay origin. The horseshoe crab abundance estimate was based on data from the Benthic Trawl Survey conducted by Virginia Polytechnic Institute (Virginia Tech). This survey, which is the primary data source for assessing Delaware Bay horseshoe crab abundance, does not have a consistent funding source. Members of the Delaware and New Jersey U.S. Congressional Delegations, with the support of NOAA Fisheries, have provided annual funding for the survey since 2016.

PR21-27

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.
