ASMFC Seeks Proposals for Regional Pilot Projects in Support of Sustainable Aquaculture: Proposals Due February 1, 2022

Arlington, VA –The Atlantic States Marine Fisheries Commission (Commission), in partnership with the NOAA Fisheries Office of Aquaculture, is issuing a Request for Proposals (RFP), seeking marine aquaculture pilot projects focused on sustainable aquatic farming techniques and regional business practices to grow U.S. domestic seafood. The geographic scope of the proposed projects is the U.S. East Coast states from Maine to Florida. The primary location of the proposed projects must be in the marine/estuarine environment. Examples of the types of pilot projects being sought through the RFP follow:

- Research and development related to the production and distribution of shellfish seed stock.
- Finfish, shellfish (other than oyster*), and seaweed farming systems, especially for those species new to aquaculture in the region or that use novel production systems.
- Identification and development of Aquaculture Development Zones with pre-planning and pre-permitting for a range of aquaculture activities.
- Resolution of issues (e.g., enforcement, water quality, public trust concerns or impacts) related to open water finfish farming in state waters.
- Business incubators
- Regional market and economic impact studies

*Note: Proposals for oyster projects were already requested in a separate RFP (2019 Regional Oyster Aquaculture Research Consortia)

NOAA Fisheries, through the Commission, is planning on issuing approximately \$600,000 for the funding period of July 1, 2022 to June 30, 2023. Individual proposals should not exceed \$200,000 or be less than \$75,000. It is anticipated that approximately 3-5 projects will be funded. Eligible applicants include researchers at U.S. academic institutions, research laboratories, for-profit companies/firms, nonprofits, and state agencies. Proposals from foreign entities are not eligible. Proposals involving multiple investigators are welcome. U.S. federal government agencies, including Regional Fishery Management Councils, are not eligible to receive funding through this solicitation. Federal staff may be collaborators on proposed projects, as long as they are not compensated for their contribution to the project.

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.

Applicants seeking to apply to the RFP must submit, as a single file, an electronic proposal by email no later than **midnight on February 1, 2022**. Please see the RFP for complete proposal details, qualifying requirements, and submission instructions. The RFP is available at http://www.asmfc.org/files/RFPs/2022PilotAquacultureRFP_Nov2021.pdf.

For more information, please contact Pat Campfield and Lindsey Aubart at Aquaculture@asmfc.org or 703.842.0740.
