## MEMORANDUM

**TO:** Atlantic Herring Management Board, Advisory Panel, Technical Committee, Interested Parties

**FROM:** Toni Kerns, Fisheries Policy Director TKK

**DATE:** August 23, 2021

**SUBJECT:** Atlantic Herring Eastern Maine Spawning Closure in Effect Starting August 28, 2021 through October 9, 2021

The Atlantic herring Area 1A (inshore Gulf of Maine) fishery regulations include seasonal spawning closures for portions of state and federal waters in Eastern Maine, Western Maine and Massachusetts/New Hampshire. The Commission's Atlantic Herring Management Board approved a forecasting method that relies upon at least three samples, each containing at least 25 female herring in gonadal stages III-V, to trigger a spawning closure. However, if sufficient samples are not available then closures will begin on predetermined dates.

There are currently no samples from the Eastern Maine spawning area to determine spawning condition. Therefore, per Addendum II default closure dates, the Eastern Maine spawning area will be closed starting at 12:01 a.m. on August 28, 2021 extending through 11:59 p.m. on October 9, 2021. The Eastern Maine spawning area includes all waters bounded by the following coordinates:

Maine coast    68° 20' W  
43° 48' N      68° 20' W  
44° 25' N      67° 03' W  
North along the US/Canada border

Vessels in the directed Atlantic herring fishery cannot take, land or possess Atlantic herring caught within the Eastern Maine spawning area during this time. The incidental bycatch allowance of up to 2,000 pounds of Atlantic herring per trip per day applies to vessels in non-directed fisheries that are fishing within the Eastern Maine spawning area. In addition, all vessels traveling through the Eastern Maine spawning area must have all seine and mid-water trawl gear stowed.
