The Board initiated Draft Addendum II in May 2023 in response to the low probability of meeting the 2029 stock rebuilding deadline if the unexpectedly high 2022 fishing mortality rate continues. The Draft Addendum builds upon the 2023 emergency action by considering management measures intended to reduce fishing mortality to the target level in 2024. For the recreational fishery, the Draft Addendum proposes recreational bag and size limit options for the ocean and Chesapeake Bay regions, including options with different limits for the for-hire modes. To address concerns about recreational filleting allowances and compliance with recreational size limits, the Draft Addendum includes an option that could establish minimum requirements for states that authorize at-sea/shore-side filleting of striped bass. For the commercial fishery, the Draft Addendum proposes a quota reduction option. The Draft Addendum also proposes an option that would enable the Board to respond to the results of the stock assessment updates more quickly, via Board action, if the stock is not projected to rebuild by 2029.
