The Commission’s Coastal Pelagics Management Board initiated the Draft Addendum to consider updating recreational allocations using more recent harvest data, which reflects increased cobia landings in some Mid-Atlantic states in recent years. Draft Addendum II presents options for Atlantic cobia management, including a framework for recreational allocation, ways to account for data uncertainty and respond to quota overages, and an extended multi-year specification setting. For the recreational allocation framework,

Draft Addendum II considers options for the data timeframe to form the basis for allocations, and options for the geographic scope of allocations (state-by-state, regional, or coastwide).
