Summer Flounder, Scup, and Black Sea Bass Board Releases Summer Flounder Draft Addendum XXXV for Public Comment

Arlington, VA – The Commission’s Summer Flounder, Scup, and Black Sea Bass Management Board approved for public comment Draft Addendum XXXV to the Interstate Fishery Management Plan (FMP) for Summer Flounder, Scup, and Black Sea Bass. The Draft Addendum considers changes to two exemptions to the summer flounder commercial minimum mesh size requirements: the Small Mesh Exemption Program (SMEP) and the flynet exemption. These changes are being considered following industry feedback indicating the SMEP has become an important program to maintain the economic viability of businesses and the definition of a flynet should be updated to reflect modern gear configurations and use patterns. Specifically, the Draft Addendum considers moving the western boundary of the SMEP approximately five miles westward, changes to the review methodology of the SMEP, and updates to the definition of a flynet under the flynet exemption. The Mid-Atlantic Fishery Management Council is considering an identical set of options through a framework action.

Two public hearings to gather public input on Draft Addendum XXXV have been scheduled: one for the New England and Mid-Atlantic states (MA, RI, CT, NY, NJ) and one for the more southern states (MD, VA, NC). Both hearings will be conducted via webinar. Regardless of your state of residence, you are welcome to participate in either virtual hearing. The public hearing details follow:
